3 Topics of Interest

1. **Physical Activities:** Physical activities are important for children and designing an age-based plan can lead to enhanced concentration in academics. Studying what kind of activities can boost intellectual curiosity from an early age can be a good area to cover.
2. **Learning Environment:** The influence of the learning environment of children on their learning capacity can be a good topic to explore. There has been extensive research on how teaching something in a natural environment can help a child more in grabbing a topic than when taught in a typical classroom setting.
3. **Bullying:** Being bullied during childhood also influences attitude towards society in later life. It will be interesting to see how such experiences can shape children's perception of the world around them.
